

## **Angelina College Faculty Credential Guide**

The Angelina College Faculty Credentials Guide provides institutional requirements for faculty credentials based on expectations from the Southern Association of College and Schools Commission on Colleges (SACSCOC) and the Texas Higher Education Coordinating Board (THECB). The *Resource Manual for the Principles of Accreditation: Foundations for Quality Enhancement* document from SACSCOC emphasizes the institution's responsibility to document and justify qualifications of its faculty. The associated **Standard 6.2a states:**

*It is the institution's obligation to justify and document the qualifications of its faculty. Determining the acceptability of faculty qualifications requires judicious use of professional judgment, especially when persons do not hold degrees in the teaching discipline or are qualified based on criteria other than their academic credentials. Similarly, persons holding a degree at the same or lower level than the level at which the course is taught require additional qualifications and the application of professional judgment. Additional justification is needed for these cases as compared to the cases where the academic credentials are a "perfect match" for the teaching assignments. Appropriate qualifications may also differ depending on whether a course is generally transferable to other institutions; qualifications for teaching non-transferable technical courses depend heavily on professional experience and appropriate certifications or work experience.*

### **Angelina College Adopted General Guidelines:**

- a. Faculty teaching general education courses at the undergraduate level: doctor's or master's degree in the teaching discipline or master's degree with a concentration in the teaching discipline (a minimum of 18 graduate semester hours in the teaching discipline).
- b. Faculty teaching associate degree courses designed for transfer to a baccalaureate degree: doctor's or master's degree in the teaching discipline or master's degree with a concentration in the teaching discipline (a minimum of 18 graduate semester hours in the teaching discipline).
- c. Faculty teaching associate degree courses not designed for transfer to a baccalaureate degree: bachelor's degree in the teaching discipline, or associate's degree and demonstrated competencies in the teaching discipline.
- d. Faculty teaching certificate courses not designed for transfer to a baccalaureate degree: certificate or higher in the teaching discipline or demonstrated competencies in the teaching discipline.

### **The THECB Guidelines for Instructional Programs in Workforce Education (GIPWE) states:**

*The following personnel qualifications information is provided to help institutions ensure excellence in instruction and career development services for students, programs, and course administration.*

1. *Faculty*

*It is the responsibility of each institution to ensure that the qualifications of faculty teaching workforce education programs and courses, both for credit and continuing education, are in compliance with the current requirements of SACSCOC, regardless of the teaching modality or location. Faculty must be recruited and appointed by the institution prior to the start of instruction. Institutions must document academic preparation, work experience, other appropriate qualifications (certificates, licensure, etc.), and justification for any exceptions to SACSCOC requirements.*

*Degrees and graduate credit hours held by faculty members, whether full-time or parttime, must have been earned at an institution accredited by an accreditor recognized by the Coordinating Board or its foreign equivalent. It is the responsibility of the institution to verify equivalency of degrees or credit hours granted by foreign institutions. Documentation of degree equivalency must be kept on file as long as the faculty member is employed by the institution.*

2. *Career Development*

*Personnel Career development personnel should have a combination of academic preparation and work experience:*

*a. Professional guidance, counseling, and career development personnel must meet the requirements of SACSCOC in accordance with their specific assignments. A master's degree in counseling or a closely related field is required; alternatively, a master's degree with significant coursework and experience in career development is acceptable. Examples of related graduate degrees include student development counseling in higher education and mental health counseling. Professional credentials, such as state professional counseling licensure (LPC) or certification by the National Board for Certified Counselors (NBCC) are preferred.*

*b. In exceptional cases, outstanding professional experience and demonstrated competency may substitute for the academic preparation stated above. This should include a combination of both exceptional coursework and experience in career development. Institutions must verify these exceptions on an individual basis and keep supporting documentation on file.*

*c. Paraprofessionals employed in specific areas, such as job placement, must demonstrate academic preparation and experience consistent with their assignments.*

## Angelina College Faculty Credential Table

The credentialing information listed below is provided as a sample to form a framework for your departmental/program discussions and determine your recommendations for required guidelines for the Angelina College full-time and adjunct faculty. The Vice President of Academic Affairs has the final authority to approve any recommendations.

Academic Area	Course Rubric	Type of Course	Credentials (minimum qualifications)
Non-Course Based Options	NCBR/NCBW NCBE  NCBM	Developmental	<ul style="list-style-type: none"> <li>• Bachelor's degree with a major or minor in English, literature, creative writing or in a related field such as education, reading, writing, linguistics, or language arts; <b>OR</b></li> <li>• Master's degree in English, literature, creative writing or in a related field such as education, reading, writing, linguistics, or language arts; <b>OR</b></li> <li>• Bachelor's degree with related teaching or training experience in one or more of the above-mentioned fields</li>   <li>• Bachelor's degree with a minimum of 12 hours in mathematics or mathematics education</li> </ul>
